

Onboarding / Verification

Documents to be Requested From Garages

To build trust, compliance, and verification integrity on LeRDV, garages joining the platform should provide a structured set of documents.

1. Business & Legal Identification

These confirm the garage legally exists.

- Company registration certificate (LBR- Extrait RCS)
 - Business authorization (Autorisation d'établissement)
 - VAT number / TVA certificate
 - Articles of incorporation (Extrait RBE)
 - Proof of business address (Contrat de baille)
 - Identity document of owner or legal representative
-

2. Operational Verification

These confirm the garage is operational and legitimate.

- Garage exterior photos
 - Workshop interior photos
 - Reception/customer area photos
 - Company logo and branding assets
 - Website and social media links
 - Business contact details
-

3. Insurance & Compliance

Important for trust and liability management.

- Professional liability insurance
- Garage/workshop insurance certificate
- Employee liability coverage (if applicable)
- Environmental compliance certificates (optional)
- Health & safety compliance documentation (optional)

4. Technical Capability Verification

- Technician certifications
- EV/high-voltage certifications
- Manufacturer accreditations
- Diagnostic equipment proof
- OBD/diagnostic system compatibility
- Battery servicing capability proof
- Paiting booth pictures and proof of insurance

5. Banking & Payment Information

Needed for payouts and subscriptions.

- IBAN / bank account certificate
- Billing contact information
- Invoicing information
- Authorized payment representative

6. Platform Verification Requirements

To be created

- Agreement to upload invoices/services
- Acceptance of verified service protocols
- Digital signature/acceptance of platform terms
- Consent to customer verification system
- Agreement to anti-fraud and transparency rules

7. Optional “Trusted Garage” / Premium Verification

For higher visibility and trust ranking.

- Years in operation proof
- Customer references/testimonials
- Manufacturer partnerships
- Fleet servicing references

- ISO certifications
 - EV specialization proof
 - Warranty provider partnerships
-

8. Data Needed Inside the Platform

Not documents, but onboarding data fields.

- Garage opening hours
 - Services offered
 - Brands supported
 - EV capability yes/no
 - Mobile service availability
 - Emergency assistance availability
 - Pricing categories
 - Number of technicians
 - Languages spoken
-
